SOURCE Meditsinskiy Rabotnik, No 28, 1949.CHEMICOPHARMACEUTICAL PLANTS IMPROVE PRODUCTION

MOSCOW PLANT TOPS PLAN -- Meditsinskiy Rabotnik, No 28, 13 Jul 49

The 6-month program of the Moscow chemicopharmaceutical plant, has been realized by 114 percent, and assignments in all 83 types of articles have been completely fulfilled. Various medicines produced above the plan were valued at 2,300,000 rubles. Stores and materials worth 200,000 rubles were saved. A number of organizational-technical measures for further mechanization of manual processes were carried out during this period. A conveyor was installed in the packing shop, increasing labor productivity by 20 percent. An automatic unit has been reconstructed in the glass-blowing shop; the installation of additional jets increased the production speed and doubled the output of glass ampules.

"FARMAKON" SAVES RAW MATERIALS -- Meditsinskiy Rabotnik, No 28, 13 Jul 49

The collective of workers and engineers of the "Farmakon" Chemicopharmaceutical Plant in Leningrad have initiated competition in the industry for above-plan production from raw materials saved. In the past 5 months, the plant saved 160 tons of raw materials and produced medicines valued at 500,000 rubles. "Farmakon" engineers have resolved to cut the length of the production cycle for streptocide and phenacetin by 8 percent and for thiocol by 20 percent. By the end of the year, this should result in the production of additional hundreds of kilograms of phenacetin, thiocol, and streptocide.
